A person wearing a light blue button-down shirt is seated at a white desk. Their left hand is holding a gold coin, poised to drop it into a white ceramic piggy bank. Their right hand is holding a blue pen over a black calculator on a clipboard. The background is a soft, out-of-focus light blue.

Energy Management
makes economic
sense.

Manage today, profit tomorrow.

Marques & Leandro Energy Management Services

Bonn, Germany; info@e-potential.net

Are your company's energy costs too high or increasing?

Are you unsure of which measures to take to reverse this situation?

An Energy Management System can help your company move forward.

Businesses reach 10-20% energy cost savings on average, without making investments.

Implementing cost-effective investments increases savings even further.

Energy Management System (EnMS)

is a systematic approach for the continual improvement of your company's energy performance.

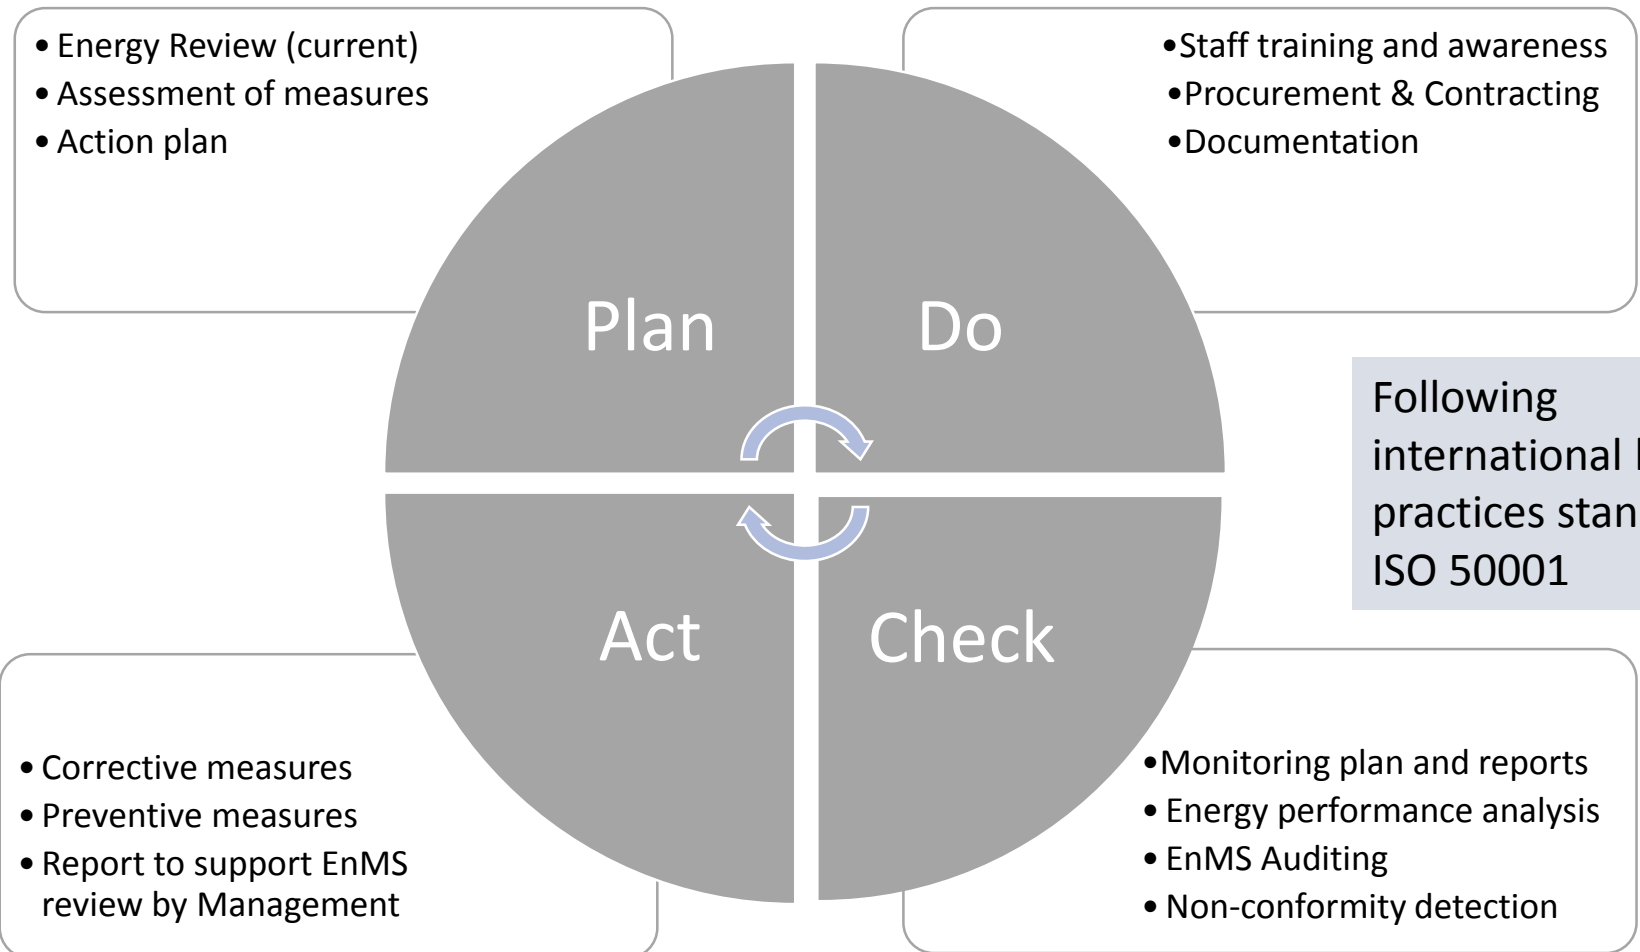

A background image showing a group of business professionals in a meeting. A woman with blonde hair is looking towards the right, and a man with glasses and a beard is looking down at a laptop. The scene is set in a modern office environment.

How will an Energy Management System help your business?

- Energy cost savings and potential tax reduction
- Increase profitability
- Increase competitiveness
- Reduce business risks
- Reduce environmental footprint
- Increase employees' satisfaction and trust

Our services: support for the continual improvement of Energy Performance

Following international best practices standard ISO 50001

If you have questions or need advice,
we will be glad to support you.
